

Access any Desktop at your company.

30 days free use

What enddevice do you use at your workplace?

- Laptop: get a VPN software installation and access you office environment from home
- Thin Client / Zero Client : You can use your own PC or Laptop with Rangee USB Thin Client for remote work. Create a Rangee USB Thin Client stick by yourself and Use it 30 days for free.
- PC: You need to open remote access to your PC and use your own PC or Laptop with Rangee USB Thin Client for remote work. Create a Rangee USB Thin Client stick by yourself and Use it 30 days for free.

If you have a PC or laptop at home, you can use it as desktop for your company workspace, without touching the private data.

You can use any USB flash, to start a Thin Client operating system.

**On the USB flash you can install the appropriate VPN Software to connect to your company network
And Remote desktop protocol to connect to your PC**

Create a Range USB Thin Client Flash

- 1. Purchase any USB Flash with min 2 GB size.**
- 2. Get Rangee Installer. Send an email to support@rangee.com
We will send you the download link and instructions**
- 3. Create a bootable USB Thin Client Flash**

Configure the Range USB Thin Client Flash (should be done by your IT administrator)

- 1. Start the Rangee USB Thin Client Flash on any device (Check your bios, how to set the boot priority to USB)**
- 2. Install the required firmware and software**
- 3. Create a VPN (with autostart option) and remote desktop connection (when desktop address becomes available)**

PC User:

You need to enable remote Access to your PC.

This document describes how to do it:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-desktop-services/clients/remote-desktop-allow-access>

At home:

- 1. Plug the Rangee USB Thin Client Flash
In your computer or laptop**
- 2. Check your bios, to set the
First boot priority to USB Flash**
- 3. Start your Rangee Thin Client**
- 4. Log on to your remote desktop**

At home:

- 1. To use your computer for private use,
Shutdown the device
Plug off USB flash
and restart.**
- 2. Enjoy your remote workstation for 30 days
free of charge**
